

CHEMJ PHARMA

CHEMJPRO

CHEMJPRO is specialised product which is a blend of multi species of bacteria *Bacillus licheniformis*, *Bacillus polymyxa*, *Bacillus megatherium*, *Bacillus pumilus*, *Bacillus amyloliquifaciens*, *Bacillus Mesentericus* and *Saccharomyces cerevisiae* with the concentration 8 Billion cfu Per gm. **CHEMJPRO** is fortified with **CHEMJPRO** enhances water quality. **CHEMJPRO** optimizer food conversion rate and product is highly adoptability to various conditions in the pond.

Dosage: 250 gms **CHEMJPRO** is recommended per 1 acre of pond.

CHEMJ MINOL

CHEMJ MINOL is having the best soluble forms of essential minerals and ions like Magnesium, Potassium, Phosphorus, Chloride, Sulphate and Enzymes and Vitamins. Predominantly use fulfor shrimp/fins and other membranes. **BENEFITS: CHEMJ MINOL** Regulates nerve impulse transmission, membrane potential and muscular control. pH, acid-base balance & osmulation, of body fluids for fish and shrimp. Used as pond fertilization to increase the production of live food organisms and phytoplankton naturally present in the pond.

Dosage: 10 kgs of **CHEMJ MINOL** is recommend per 1 acer per week.

CHEMJ SOFTNER

CHEMJ SOFTNER contains Ethyle di amine tetra acetic acid (EDTA) which can be used safely to reduce the hardness of water. **CHEMJ SOFTNER** prevents problems of hasrd shell in shrimp. It successfully alter the alkanity of the water into saline which reduce the hardness of the water and alters as fresh water. How to use. It can be mixed with appropriate quantity of sand for uniform application.

Dosage: 1kg of **CHEMJ SOFTNER** is recommend per 1 acer of pond.

CHEMJ STRENGTH

CHEMJ STRENGTH is a symbiotic blend of probiotic with vitamins, minerals and digestive enzymes, which helps to improve digestion. It is used to control in diagestion, gut problems and minerl resource. Gives the good results the controe the whitgut disease. This is used to optimise the ph levels in the gut flora. ingrediants lactic acid bacillus strains, vitamin c, vitamin d, amylase, cellulase, lipase and xylenease. herbal minerals

Dosage: 3-5gm/kg feed in normal conditions 5-10gm/kg feed in a normal conditons or advised by aquatechnician.

GUT FIGHTER

GUT FIGHTER contains lactic acid bacillus, fortified with vitamins and minerals. **GUT FIGHTER** removes unwanted microorganisms. It improve digestion and absorption of minerals. It increases collagen synthesis. And accelerate in crustaceans, It increase feed convesion ratio. **GUT FIGHTER** strengthen immune system.

Dosage: 5-10 gms of **GUT FIGHTER** is recommended per 1kg feed.

GASOPAS

GASOPAS is blend of extract of yucca schidigera and bio converter to reduce ammoniapollution resulting from shrimp forming. It inhibits enzyme urage or uricage block the further production of ammonia. **GASOPAS** binds pre formed ammonia and immediately releases from the ammonia stress. **GASOPAS** removes the irritating odour due to ammonia.

Dosage: 500 gm of **GASOPAS** is recommend for acer of pond.

CHEMJ PS

CHEMJ PS contains Rhodobacter, Rhodococcus and B. pumilies probiotic bacteria which is biologically disengage pollutant hydrogen peroxide into its salt. It is helpful to reduce the requirement of biological oxygen, as it reduces pollution with the bottom of pond. It is helpful in vigorous growth of shrimp by controlling polution and securing aerobic condition at the pond bottom.

Dosage: 5-10 Ltr per acer / week

CHEMJ CLEANER

USES: CHEMJ CLEANER is used as fungicide destroys spores forming fungi as well as pathogenic and non pathogenic moulds. **CHEMJ CLEANER** has a role, concurrently with specific oral antibacterial treatment, in generally reducing the bacterial loading in the water containing fish with bacterial diseases. **CHEMJ CLEANER** effectively controls protozoal diseases. **CHEMJ CLEANER** is advocated for prophylactic treatment of surface ulcers, wounds and lesions in shrimp cultures. **Composition:** Stabilized formulation of benzalkonium chloride 80%

Dosage: 1 Ltr/acre/3 feet water depth, Presentation : 1 Ltr.

CHEMJ C

Chemj-C is a rich source of herbal vitamin C. **Chemj-C** contains bioflavonoids like kaempferol-3-O-B-D-glucoside and quercetin-3-O-BD glucoside, which ensures better absorption of the supplement in the body. **Chemj-C** also contains gallic and ellagic acids that have potent antioxidant properties, helping scavenge free radicals and reducing stress of varied etiologies.

Dosage: Administer 100g per ton of feed.

CHEMJ PHARMA

CHEMJ GROWTH

CHEMJ GROWTH is a unic blend of betaglucons, oligosaccharides and vitamins. growthcare plays an important role in shrimp. it reduces mortality rate and increase the survibility of shrimp. growth increases the immunity of the shrimp. **CHEMJ GROWTH** is easily digestible and improves the fcr. ingredients:

- » betaglucons
- » mannoligosaccharides
- » vitamin c

Dosage: 3gm/kg feed 10-30 days 5gm/kg feed 30 - 120 days or advised by aqua technician..

GILL PROTECT

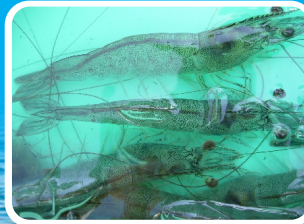

GILL PROTECT is unic blend of different species of probiotic strains which are used to treat the blu, brown and black gill. **GILL PROTECT** reduce the organic matter and remove hydrogen sulfide, then slowly bring the aerobic condition.

Probiotic species

- » bacillus pumilus
- » bacillus megaterium
- » thiobacillus denitrificans
- » bacillus lichinoformies.

Dosage: 1.5 to 3 kg per hectare 5 to 8 gm/kg feed or suggested by aqua technician

CHEMJ HERBAL CARE

CHEMJ HERBAL CARE is an organic product which was manufactured from organic herbs. these herbs contain a large amount of minerals, vitamins, antioxidants and amino acids. herbal care plays an important role on growth and moulting. **CHEMJ HERBAL CARE** replaces the harmful chemical usage for the moulting in shrimp. herbal is useful to create immunity to the shrimp.

Dosage: 5-10gm/kg feed during moulting time. 3-5 gm/kg regular usage suggested by aqua technicians. mp: 2189/- inclusive of all taxes.
